

VivoVivo Biotech

Make Tissues, Cells, Genes and Molecules Visible

VivoVivo™ Histopathology and LCM Services

Why Choose VivoVivo™ Services ?

- Full histology, molecular histopathology and LCM services
- High quality and competitive pricing
- Turnaround : 3-5 days after we receive the order
- Expert evaluation
- State-of-the art Arcturus XT™ LCM System and histology Lab facility
- Free pickup for local customers

Our Services

1. Routine Histology and Cryotomy

2. Special Staining

3. Immunostaining (IHC/IF)

4. Laser Microdissection

Histology and Molecular Pathology Expert

Johnson Wang, MD, PhD

- ❖ 16-years of hand-on experiences in histology and molecular histopathology, LCM, animal model, cancer research and stem cells at NIH, university and biotech companies in USA.
- ❖ Over 80 peer-reviewed publications .
- ❖ Former director of Division of Pulmonary Medicine, Guilin Medical University in China

Advisory Board Pathologists

Mike Emmert-Buck, MD, PhD

- ❖ World well known physician-scientist.
- ❖ 20 years as a principal investigator at NIH.
- ❖ Over 200 publications.
- ❖ Inventor on 20 allowed or submitted patent applications.
- ❖ Former Chief, PGU, Laboratory of Pathology and Director, LCM Core Laboratory at NIH.
- ❖ Developed laser capture microdissection (LCM).
- ❖ Expertise in experimental pathology and precision medicine.

John W. Gillespie, MD

- ❖ Former principal scientist at NIH/NCI.
- ❖ Contributed to the invention of LCM at NCI/NIH.
- ❖ Over 60 publications including over 30 publications entailing use of LCM.
- ❖ Co-editor of a textbook entitled "Dissecting the Molecular Anatomy of Tissues: Principles and practice," Springer (Heidelberg).
- ❖ Expertise in histological interpretation of tissue, LCM and molecular pathology.

5. In Situ Apoptosis (TUNEL)

6. In Situ BrdU Cell Proliferation

7. Fluorescent in Situ Hybridization (FISH)

8. FFPE /Cryotomy Services for 2D, 3D or Organoid Culture Cells

9. DNA, RNA and Protein Isolation from FFPE or LCM Samples

- DNA straction from FFPE or LCM samples
- RNA/miRNA isolation from FFPE or LCM samples
- Protein isolation from FFPE or LCM samples

10. Histology Image and Analysis Services

- Digital image
- Histopathologic scoring
- IHC/IF and TUNEL visual scoring
- Delineation of tissue regions of interest

11. Histopathology Slide Review by Certified Pathologist

- Histological interpretation
- Microscopic description
- General experimental pathology, reporting and description
- Review FISH, IHC/IF and histochemistry slides.
- Histo/pathological description for Publication

How to Order VitroVivo Histology Services?

- Step 1:** Fill the Service Request Form and email to: service@vitrovivo.com. We will send a quote to you.
- Step 2:** For local customers, we will go to your lab to pick up your samples. For non-local customers, please ship your samples to VitroVivo Biotech, 405 E Gude Dr, Suite 214, Rockville, MD 20850.
- Step 3:** After we receive your order, we will email a sales order to you or your purchasing agent.
- Step 4:** We will deliver or ship your service products to you in 3-5 days.
- Step 5:** An invoice will be sent to you or your purchasing agent.
